## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, 24-25, and 29-35 drawn to generating audio file and sending email to subscriber with attachment, receiving reply to email and deleting voice message in response, classified in class 379, subclass 88.14 Audio message storage, retrieval or synthesis with presentation format conversion.
  - II. Claims 18-23, and 26-28, drawn to updating prompt messages on plurality of voice messaging systems, classified in class 379, subclass 88.22, Audio message storage, retrieval or synthesis with message management.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, the invention of group I has separate utility such as for enabling users to receive notification that voice messages have been received and providing election of the message to reduce storage needs, group I inventions do not require the updating of prompts on a plurality of messaging systems as per the group II invention.

Art Unit: 2645

The invention of group II has separate utility such as for enabling a user to update prompts to play to specific other users and to determine which message to play on certain dates or under certain circumstances such as when a user is on vacation and does not require the sending of email to subscriber with audio attachment, receiving reply to email and deleting voice message in response as in the group I invention.

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and vice versa, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2645

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
